PEONIES IN LANDSCAPE PLANTING

Peonies and Irises

Finest of Landscape Flowers

FEW WILL take issue with the statement that modern Peonies and Irises have come to be the best of perennials grown in American gardens, and the finest of landscape flowers.

In size, in color range, in beauty form, they dominate their rivals; and all this excellence is accompanied by extreme hardiness, vigor and relative freedom from disease. Their season has come to be the climax of the spring garden display. And every garden will be lacking without representative plants of the better named varieties of these flowers.

How changed the peony has come to be, since the days when early officinalis rubra with its bright red blossoms was its common representative in gardens. Its chief claim to eminence in the floral world used to be its size. But now, with size greatly increased, we have blossoms of a coloring unsurpassed for subtile shading. We have Solange, which Mrs. Edward Harding compared to an oriental pearl; Therese and Walter Faxon, the exquisite pinks; LeCynge, milk-wh ite with petals curving like the feather's on a swan's wing and others in number of a quallity which not the finest roses can surpass.

The modern iris, and the modern garden—without the first, the second seems impossible. So completely do the new irises fill the specifications for a landscape flower, as decreed by the most recent revision of the cannons of gardening art—it would seem that Nature and the designers were in agreement.

In the collections listed on this page, are included the finest of named varieties of recognized merit, which ought to be included in every collection. Before each variety is given the rating, on a scale of 10 points, assigned by the Peony and Iris societies. A complete list of named varieties of peonies is found on Pages 26 and 27; and of Irises, on pages 24 and 25.

IRIS AMBASADEUR

Tulips for *Color-Scheme* Borders

IN THE spring, gardens should be gay. Brilliant, dazzling color is welcome in the cool sunshine of April and May. Later we shall require coolness, and restfulness in the garden picture, but when spring comes after the long winter rest, we look eagerly for stimulating, joyful color in the landscape.

No doubt it is to meet this need, which must always have been felt by garden makers, that tulips have been developed to their present array of colors. The gay carpet beds of early tulips and hyacinths once popular, were as much a sign of spring as the robin's song. With the new emphasis being given architectural gardening in city surroundings such beds may return to favor. And in the home garden, where the carpet-bed form is avoided, there is no reason why we should reject gay color. We can plant our borders so that from April to June they sing of the summer's glory to come.

Plant Tulips in Border Groups

BOTH in early and May-flowering tulips there is a wealth of tall, graceful varieties of beautifully blended colors, which can be used in the formal or natural garden, to produce the effects which present-day taste demands Placed among the perennials, in groups of 25 or 50 of a single variety, they will easily produce the most pleasing color-scheme planting of the year.

There are several reasons for this. Tulips are most dependable. Seldom does a bulb fail to produce a flower, if planted in good drainage. The flowering season is uniform, both as to bulbs of the same variety, and varieties of the same class. While there is a pleasing variation in height, there are no great extremes, and one knows in advance about how tall a variety will grow. Any color selection can be made in buying tulips of a reliable dealer more exactly than with most other flowers.

All these points assist careful planning, and contribute to the success of the undertaking, so that in few other garden enterprises is one so likely to experience the delight of seeing in life the picture one had planned on paper.

Color harmonies of any description can be created with tulips. The most delicate blendings of pinks, lavenders, and orange tones can be worked out if desired. But for gay effects, what is known as harmony by contrast may be recommended. Here complimentary colors, boldly contrasting in hue, are planted together. Violet and yellow, pink and lavender, and even yellow and red in limited amounts, will find no one to quarrel with their brilliance in the May garden.

To one who is accustomed to think of tulips in formal plantings only, perhaps in single rows of sentinel-like flowers edging beds and borders, a garden of tulips planted in groups will give a new idea of the possibilities of this flower.

Try a Color-Scheme Border

TO MAKE it easy to try a color-scheme border planting for next year, we have planned 8 combinations of which we offer bulbs of our selection at a special price.

TULIPS IN THE BORDER, WITH PHLOX DIVARICATA

We are able to make a special price, because we can select the colors demanded from varieties of which we are not short. There is never any way to tell what named varieties are to be in most demand each year. We order on the basis of last year's demand, the only basis we have; but usually sales go differently, and we soon find ourselves with a shortage of some varieties and a surplus of others; and the latter are apt to be the finer and higher priced.

Named Varieties, Each Labeled

While we cannot allow you to specify the varieties to be included in these collections, each variety will be labeled with its name. And where the larger quantities of a collection are ordered, different varieties of a color will be sent. Thus, in an order for 100 each of pink, lavender and yellow tulips, several varieties of each color will be sent, in bags of 25 each. And so with all other collections.

Newer Tulips for

CHERRY BLOSSOM (Darwin) — Each, $0.60; Doz., 5.50

NEW varieties of tulips are constantly being introduced by Dutch breeders. In most cases they add new colors or color combinations to the already superb range which the tulips afford. In some cases novel forms are featured. On these pages we have listed recent introductions of interest.

Darwin Tulips

Anton Mauve Enormous flower of beautiful violet, bordered soft, grayish white. A georgeous variety that looks exceedingly well in combination with the lighter shades. Doz. $1.30; 100, $9.00; 1,000, $85.00.

Aphrodite (30 in). Clear silvery pink, deeper within, large oval-shaped flower on tall, strong stem. A most beatuiful tulip. Doz., $2.00; 100, $15.00; 1,000, $140.00.

Blue Perfection (Formerly Enchantress). Bright violet; bordered heliotrope, with a white base slightly marked with a blue ring. The petals are very pointed and slightly reflexed. A beautiful flower of good form and much substance. Height, 29 inches. Each, $1.00; doz., $10.00; 100, $75.00.

Cherry Blossom A sport of the magnificent Pride of Haarlem, probably the most popular tulip in existence. This offspring, besides having its own good qualities, possesses all of its parents, and tends to bid for some of Pride of Haarlem's popularity. The color is a beautiful, bright cherry-pink, delicately edged white with a bluish white base. Each, 60c; doz., $5.50; 100, $45.00.

Eclipse Rich, glowing dark red, with a blue base circled by white. A giant tulip of good form on a tall, strong stem, which does not easily snap in stormy weather, making it very good for the garden, and exhibition purposes. Really a royal tulip, which we highly recommend. Height, 30 inches. Doz., $2.50; 100, $18.00; 1,000, $175.00.

Eugene De La Croix Shining, satiny black. Not as compact a flower as is Faust, with the petals slightly pointed. It is a wonderful addition to the few dark tulips. Doz., $1.60; 100, $11.00.

KING GEORGE V (Darwin) — Doz., $ 2.40; 100, 17.00

King George V An immense flower of brilliant cherry-rose with a light blue base on a tall, strong stem. The color is dazzling in its brilliance, and this is without doubt one of the finest and most beautifully formed Darwin tulips, worthy to bear a royal name. Height, 28 inches. Doz., $2.40; 100, $17.00.

Mount Everest A very beautiful, large flowered, white tulip of wonderful form and great substance. The small blue markings in the base, combined with its black anthers, proves a very pleasing contrast with the glossy whiteness of the large cup. The stem is tall and strong thus preventing the splashing of the flower by mud which may be caused by the early spring rains. Height, 28 inches. Each, $1.50; doz., $15.00.

Porthos Another wonderful addition to the rather small class of pure white Darwin tulips. The flower is of excellent form and purest white. Just as the black anthers of Mount Everest make that variety outstanding, so the yellow anthers of Porthos harmonize with its whiteness and enhance its chaste beauty. Each, $1.50; doz., $15.00.

Prince of Wales Bright cherry-red with a white base finely striped blue. Enormous flower on a tall, stiff stem. Height, 28 inches. Doz., $2.25; 100, $16.00.

Prince of the Netherlands Glowing cerise, flushed salmon-rose, with a small, light blue base. Extra large flower of striking color and great substance, borne on a tall stem. Height, 30 inches. Doz., 70c; 100, $6.00; 1,000, $55.00.

SUNDEW (Lacinated Darwin) — Doz., $ 3.50; 100, 25.00

Queen of Hearts (Formerly Apple Blossom). A beautiful soft rose sport of the old stand by, Farncombe Sanders, with steel blue anthers and pure white base. A very valuable addition to the rather limited class of Darwin tulips which may be grown indoors. Each, $1.00; doz., $10.00.

Rensselaer A very beautiful, pure white flower with black anthers. A rare tulip of glossy finish that is as gorgeous as it is rare. Height, 29 inches. Each, $1.50; doz., $15.00.

The Bishop A magnificent large flower of clear, deep violet, with a blue base circled by a white halo. A beautiful tulip of good form. Height, 29 inches. Doz., $3.50; 100, $25.00; 1,000, $175.00.

Venus The large flower is of exquisite rose, with a white center slightly edged light blue, while the petals possess a peculiar, silvery sheen. A grand exhibition tulip. Height, 30 inches. Each, 50c; doz., $4.50; 100, $35.00.

Walter T. Ware (18 in.), Deep golden yellow, slightly shaded orange; the deepest and richest color among the late tulips; broad, globular flower, reflexing at the top, wonderfully handsome. After cutting this tulip in the garden while in full bloom, it lasted nearly two weeks inside, growing larger and more beautiful every day. It is positively the finest May Flowering tulip in this color. Doz., $1.75; 100, $12.00; 1,000, $110.00.

DIDO (Cottage) — Doz., $ 3.00; 100, 22.50

Laciniated Darwin

Sundew This flower is something entirely new in tulips. The curved petals are provided with barbs, giving the edges of the flower a fringed effect. It is said to be a natural sport of the popular variety Bartigon, retaining the brilliant crimson coloring and magnificent size of its parent. Doz., $3.50; per 100, $25.00.

Cottage

Ambrosia This beautiful new variety of Cottage tulip contains a combination of shades—bronze with rosy lilac glow; inside of the large, well-shaped flower is a salmon-orange tone. Height, 22 inches. Doz., $2.25; 100 $16.00.

Argo This extraordinary variety is well taken by all who have seen it. While the flower is not large, it stands out amongst all others for its rich color. It is deep golden yellow, slightly penciled toward the top edges with orange, which deepens as the flower ages. Doz., $1.75; 100, $12.00.

Dido A large, well-formed flower of rich orange-rose tone, with margin of bright orange-yellow, inside bright orange with yellow base. Height, 24 inches. Doz., $3.00; 100, $22.50.

Lord Carnarvon Has a well defined band of clear bright pink on its magnificent pointed petals which makes it amazing. The tulip has an uncommon form, and the band or striping of pink makes it a wonderful flower. Height, 26 inches. Doz., $2.50; 100, $18.00.

> Dear Sirs:—Last October I sent for a collection of tulip bulbs that was advertised by you and I wish to tell you how pleased I am with them. They are fine large blooms and beautiful colors, giving me much pleasure and they have been admired by every one who has seen them. My garden is a small affair, and for several reasons does not have much care, but these bulbs have been most satisfactory. Very sincerely yours,

Cottage Tulips

SCARLET EMPEROR — Doz., $ 1.50; 100, 10.00

AS WITH the Darwin and Breeder types, the classification of Cottage tulips is by race and history, rather than any striking difference in appearance. This type is inclined to have pointed petals, sometimes turned back, and the blossom to be smaller and more slender. But they harmonize perfectly with the Darwins and Breeders and supply a quality of clear, bright color which these lack; while they have pure yellows not found in others. Every known shade is to be found among these, from deepest crimson to bright red, orange, glorious yellows, pink and a host of delicate tints of yellow, pink-cream and heliotrope. They blossom a few days later than the Darwins, often carrying the flowering period of Spring bulbs into the early days of June, especially if planted in a shady position. Many sweet-scented varieties are included, such as Ges. Lutea, G. Lutea Pallida and Mrs. Moon.

***For Pots.** When grown in pots, these, like the Darwin tulips, can be had in flower indoors during March and April, in a temperature not exceeding 55 degrees. Those best suited for growing in this way are marked*.

Parcel Post. Count twelve bulbs to one pound, fifty to four pounds; one hundred as seven pounds. Larger numbers are sent by express.

Breeder Tulips

ATTRACTION (Breeder) — Doz. $ 1.75; 100, 12.00

BREEDER tulips are closer to the parent type of this ancient flower than others. The origin of the tulip is hidden in the dim past. But we know that the Dutch fanciers who in 1634 to 1637 speculated in new varieties during the reign of **tulipomania** grew the "mother bulbs," or Breeder tulips, to produce new striped varieties by "breaking." The Darwin race is supposed to have developed from the Breeders. For a long time the dark, rich colors of the latter were neglected in favor of the brighter and clearer tones of the other types. But recently taste has changed, and the richly hued Breeders have come into favor.

They blossom in May, and though not so tall, perhaps produce, as a rule, even larger blossoms than the Darwins. The colors include many rare among flowers—browns, bronzes, purples, blue-blacks, deep mauves, dull gold and dark lilac all exquisitely blended.

Planting. Plant the same as Darwins. Parcel post weights are also the same.

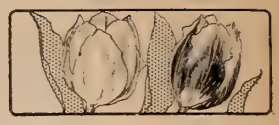
Single Early Tulips



COULEUR CARDINAL — Doz., $1.15; 100, 7.50

EARLY TULIPS have suffered undeserved neglect by gardeners who think of them chiefly as material for beds of the carpet type. The fact that these tulips, with their brilliant colors, their short stems and uniform height, formed ideal subjects for the geometrical patterns worked out in flowers which were the fashion a few years back, should not blind us to their usefulness in the modern garden.

Two or three weeks of brilliant color in April, following the daffodils and preceding the Darwin tulips, are worth much to any garden. The early tulips alone can supply it; and among them can be found varieties to play almost any part your garden scheme demands. It is a mistake to think of the early tulips as all short-stemmed, and too bright in color. It is true their brilliancy cannot be excelled by any other class of their own family or any other flower family that we know. But there are also varieties of delicate tints and shades, as beautiful and with flowers as large as anything the May-flowering classes can produce. In height, 12 inches is not uncommon, and a graceful carriage fits these taller kinds to serve in any role a Darwin would grace.

Explanatory. The number following the name of the variety denotes the height in inches, while the (a) and (b) indicate their earliness of bloom—the (a's) flower together and are earliest; the (b's) flower together, but are somewhat late. The Duc Van Thol Tulips should be used for pots only.

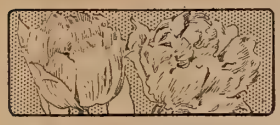
GEN. DE WET (Single) — Doz., $ 2.00; 100, 15.00



Double Early Tulips

THERE is a distinct revival of the popularity of double tulips. Coming a little later than the singles, they last much longer, and where the single and double are planted together the season of flowering is prolonged from two to three weeks. The double tulips require a soil more fertile than the singles for perfection of blossoms; and where well grown their mammoth peony-like flowers of delicate or brilliant coloring are most effective either in groups in the border, or in formal beds. The double tulips do very well when grown in pots for winter blooming, but they must be forced more slowly than the single tulips.

Explanatory. The number following the name of the variety denotes the height in inches, while the (a) and (b) indicate their earliness of bloom—the (a's) flower together and are earliest; the (b's) flower together, but are somewhat late.

Giant Amaryllis—Largest of Forcing Bulbs

OF ALL bulbs which the amateur can grow successfully indoors, the Amaryllis is at once the largest, most beautiful, surest to flower and most easily handled. Our new hybrids, especially, are so gorgeous in size and coloring as to amaze those not familiar with them. From a single stem, spring from one to three lily-like flowers, six to eight inches in diameter. So vigorous are the bulbs that they will blossom if stood on a table in a warm room, but it is better to grow them in pots.

They thrive best in a compost of two-thirds good garden loam with one-third leaf mold, to which should be added a little sand. They require temperature of 50 to 55 degrees, and if to be forced it should be raised ten degrees.

Place only one bulb in each pot, covering it as far as the neck or upper narrow part. Water sparingly at first until the flower shoots begin to appear. Some growers keep them in the dark until the flower stems are four or five inches long, and then bring them to the light.

After flowering they should be placed in a warm window, or set outside in sand or cinders and watered every day (sometimes twice a day), until the end of August when water should be gradually withheld and the bulbs allowed to go to rest.

EQUESTRE. Orange-scarlet. Each, 30c; doz., $3.00; 100, $22.00.

JOHNSONII. Has immense trumpet-shaped flowers, which measure 6 to 8 inches across, are borne on strong fleshy spikes, and are rich, deep velvety crimson, each petal having a broad white stripe contrasting beautifully with the deep red color. Each, 55c; doz., $5.50; 100, $40.00.

Wild Tulip Species

For the Rock Garden and Hardy Plant Border

The general characteristics of the various species, all of which are natives of Asia Minor and Central Asia, are bright colors and recurved petals. These Tulips do not always feel happy in their new surroundings and after two, or possibly three, seasons they will disappear. With care and the provision of suitable quarters they will flower quite satisfactorily. They feel best contented in rock gardens and borders.

Australis (Celsiana.) Yellow, shaded brown. Doz., $1.75; 100, $12.00; 1,000, $110.00.

Clusiana "Lady" or "Candystick" Tulip. Outer petals bright cherry red, inner petals creamy white, with violet base; small flower, but very distinct. It should be planted in light soil 6 or 9 inches deep, in the rock garden or among stones in the front of the herbaceous border. A warm and sheltered situation should be chosen, where it will prove to be a gem among early flowers. Flowering season late April. Height, 8 inches. Doz., $1.20; 100, $8.00; 1,000, $75.00.

Cornuta Stenopetala Beautifully formed flower, laciniated like a Parrot Tulip, but held upright on tall, stiff stem. Very interesting and curious in a collection. Color combination, scarlet and gold. Doz., $1.60; 100, $11.00; 1,000, $100.00.

Greigi Aurea Brilliant orange-scarlet, with deep yellow goblet-shaped flower, pointed, slightly reflexing petals and broad, thick leaves flushed with purple. Flowers in late April and May, and is a gorgeous Tulip. Wants a hot, dry situation. Height, 9 inches. Doz., $3.50; 100, $25.00.

Kaufmanniana Large, creamy flower, brilliantly marked with carmine, yellow center. Flower opens flat and is carried on a stem usually less than a foot in height. Blooms early in April. The bulbs should be planted six inches deep. Splendid for naturalizing in shady places; self-sows freely. Height, 5 to 7 inches. Doz $3.50; 100, $25.00.

Marjoletti Soft primrose, shaded carmine-red at base; a small flower of very attractive color. This tulip comes from Savoy, and flowers about the second week in May. Height, 14 inches. Doz., $1.35; 100, $9.50; 1,000, $90.00.

Striped and Parrot Tulips

Striped Tulips

THOUGH too gay for modern taste to serve in large plantations, the old-fashioned striped tulips are beautiful. They prove that the Dutch tulipomania was not without excuse, and no gardener who wishes his collection to be representative will be without some specimens.

For indoor decoration a few of these truly beautiful and unquestionably striking flowers will be found most welcome. Particularly in May, when they blossom, will their contrasted shades be welcome both indoors and out. **Culture,** same as for Darwin's.

Lilies of the Valley

Will Flower in 21 Days

Lilies on Your Table All Winter

One month covers the time from planting cold storage lily of the valley pips, through flowering, and fading. To keep your bowl filled through the winter we have arranged to book orders for divided shipments, a month apart. Cold storage pips must be planted promptly on receipt. We will send the first shipment at any date you wish (Nov. 25 will give you Christmas flowers) and will duplicate the shipment every 30 days thereafter, as long as you wish (until April 1). Minimum shipment is 25 bulbs, for **$2.00**, prepaid to 300 miles. For two months' supply (25 each 30 days), send **$4.00**; 3 months, **$6.00**; 4 months, **$8.00**; 5 months, **$10.00.**

THESE beautiful, fragrant flowers may be brought to flower in 18 to 21 days, if pips from cold storage are used. They are easily forced in a bowl, if planted in sphagnum moss and kept well watered. Their dainty fragrance is preferred by many to the large Paper White narcissi, and they are much quicker to flower. Do not order more than you intend to use at once as the cold storage pips will not keep. Plant about 25 pips in a 7-inch bowl, place in a warm temperature, 65 degrees Fahrenheit and shade from light until leaves and spikes are well developed, then admit light gradually. Increase temperature to 75 degrees or 80 degrees if possible. An inverted pot over each bowl answers admirably to shade them. They may be forced in soil the same way, in a 7-inch pot or pan. This is the treatment for cold storage pips only.

COLD STORAGE PIPS, ready November 1. 25 for **$2.00**; 100 for **$6.50**, postpaid.
SPHAGNUM MOSS, sufficient for 25 pips, **10c**, postpaid.

LILIES of the VALLEY Forced in Sphagnum Moss

Bulbs to Flower in Pebbles and Water

Paper White Narcissus

THESE have been favorites for ages as a decoration for the living room during the coldest winter months when flowers are scarce. Their culture is simple, and with good strong bulbs such as we supply, flowering is sure. Plant bulbs in shallow bowls filled with pebbles, or fibre, and water. Keep in the dark until roots form (about 2 weeks) then bring into light. A day temperature of not over 70° is best.

Chinese Sacred Lily (Narcissus)

THIS narcissus is called by the Chinese the "Jos Flower" or "Flower of the Gods," and "Water Fairy Flower." It is highly prized for the abundance of its flowers and its marvelously rapid growth. The flowers are white, with yellow cup, and very fragrant; they are mostly single, but a few doubles are sometimes found amongst them. Each bulb produces several flower-spikes, bearing many flowers. In China and Japan the bulbs are grown in the living rooms in fancy bowls filled simply with pebbles and water. The bulb in this country can be grown as successfully as in China, and it is most interesting to watch its rapid growth, which is about twenty inches in forty days; place in a sunny window by day and on a table near the center of the room by night, as frost destroys the flower buds. Care should be taken that it is not placed in a draft, as this may cause non-flowering. Recommended for Christmas flowering.

CHINESE SACRED LILY

Daffodils or Narcissi

The illustration shows the Daffodil, Van Waveren's Giant, one of the largest of the large trumpet class, in the center; and the Daffodil Olympia, at the right. Above is a Barri Narcissus, Incognita, and below on the left a Poeticus King Edward VII, and on the right a Leedsii Narcissus, White Lady.

COMING in March or April, Narcissi or Daffodills, are the first of the flowers that dominate. They are most pleasing in natural arrangements. They like to nestle at the feet of shrubs. Once planted they need not be lifted until they crowd. Naturalized, the Leedsii, Poeticus and Incomparabilis classes thrive best.

The yellow large trumpets like a fairly heavy soil, while the white trumpets and Leedsii take more kindly to a sandy soil. Do not use fresh manure, but fertilize only with bone meal. Plant the bulbs six inches deep and the same distance apart, in a deep, well worked soil.

Trumpet Variety

Emperor A magnificent sort. The entire flower is a rich yellow; trumpet of immense size and petals so broad that they overlap. Three of these bulbs planted in a 6-inch pot will make a splendid show. Large bulbs, each, 20c; per doz., $2.00; 100, $15.00.

Glory of Sassenheim A large showy flower with broad, imbricated creamy white perianth and bright canary yellow bold trumpet, well expanded at mouth. Height, 18 in.; a good early forcer. Each, 20c; per doz., $2.00; 100, $15.00.

Robert Sydenham The heavily frilled trumpet of golden yellow, glittering as if sprinkled with gold dust, is backed by a symmerrical soft sulphur yellow perianth. The length of the stem and the quality of the foliage match the blooms. Free flowering and a good propagator. Entirely hardy. Each, 50c; per doz., $5.50; 100, $40.00.

Sir Francis Drake Clear yellow, large, very early, long stemmed cutflower and showy variety. Each, 45c; per doz., $4.50; 100, $35.00.

Height, 17 in.; a fine exhibition variety. Each, 40c; per doz., $4.00; 100, $30.00.

Van Waveren's Giant The largest of all trumpets, perianth primrose, trumpet bright orange-yellow. Each, 45c; per doz., $4.50; 100, $35.00.

Hyacinths

Hyacinths in Pots for Winter Blooming

A LIGHT, rich soil produces the best flowers. Place each bulb one inch deep, an inch and one-half from each other bulb or edge of pot. Water well, and set away in a dark, cool cellar, or an outdoor pit which is well drained. If outside, cover with three or four inches of sand or ashes. Let them remain there for eight or ten weeks to root, then bring them into a warm room, but keep them in the dark (cover the pot with a paper bag, cloth, etc.). Then when the flower spike is three or four inches out of the bulb, they may be exposed to the light, and will open beautifully. The larger bulbs are best for indoor growing, the largest bulbs throwing the most magnificent flower spikes. French-Roman Hyacinths are excellent for growing in pots, flowering earlier than the others.

Hyacinths in Glasses

Fill the glass with clear, soft water, so as to nearly touch the base of the bulb, putting a small piece of charcoal in each glass to keep the water pure and sweet. The filled glass should be placed in a dry, cool, dark place, and kept there until the roots almost touch the bottom of the glass, when they may be given more heat, and gradually exposed to the light. Water must never be changed, but only be replenished. Large bulbs are best for this purpose.

Hyacinths in Gardens

Hyacinths are returning to popularity for both formal beds and border plantings. They provide much needed blues. Plant in any good, well drained soil. The beds should be raised several inches above the surrounding ground to prevent lodgments of water which causes bulbs to root. Bulbs should be set six inhces apart and six inches deep. The smaller bulbs produce good results when planted outdoors.

Numbers following name of variety indicate time of flowering, each number following in time of flowering.

The Hardy Lilies

LILIUM AURATUM

LILIES are so beautiful, so fragrant, we are likely to think them too fine for the amateur to grow. But many are hardy, thrifty flowers, capable of surviving conditions which would overcome flowers much less beautiful. Grow them in the border in small groups, with background, where their beauty has a suitable setting for its display. They blossom, as a rule, in midsummer, when fine flowers are at a premium. It is advisable to plant the bulbs slightly on their side.

ANNUAL LARKSPUR Vaughan's Special Mixture

FEW know many of our prettiest and best known annuals may be sown in the fall, in fact some varieties, like the annual Larkspur, are much better treated in this way. The principle is the one Nature uses. Seed dropped from parent plant will lie dormant in the soil until early in the spring when it germinates and begins a root system long before one can get in the ground to sow seed. Consequently the flowering season is prolonged by the earlier blooming. Ground should be prepared and seed sown just previous to the late heavy frosts.

The fall-sown plants are, as a rule, much sturdier and better established on the blossoming date than those started indoors.

Another advantage of fall sowing is that it relieves pressure in the springtime. Care should be taken, not to sow too early, as the seed will germinate and die in the fall.

Perennials for Fall Planting

HARDY perennials may be set out this fall in time to become well established before winter sets in; and next year will see them better developed, and bearing finer flowers than can be obtained from plants set in your border next spring.

This advantage is accompanied with very little extra risk. We do not list the kinds which need special protection through the winter. It is always well to apply a mulch over newly planted perennials, after the ground has frozen. This will tend to prevent winter thaws and frost heaving. Plants should not be placed where water stands, as excessive dampness in the winter causes rot.

All plants are F. O. B., Chicago.

Plants are shipped with their roots well wrapped; and as packages must go by parcel post or express, it is impossible to make prices which cover postage, and are fair alike to all customers. So all prices in our plant list are F.O.B. Chicago, and if it is desired to have them sent by mail, postage should be added at zone rates. If sent by express, they go collect, at customer's expense.

ACHILLEA (Milfoil. Yarrow)

Horizontalis. "Deservedly the most popular of the red-fruited varieties," says E. H. Wilson of the Arnold Arboretum. A dwarf shrub with densely spreading horizontal branches almost prostrate. Is much appreciated in rockeries and the front of borders, to display its crimsoning leaves and scarlet fruits deep into winter. 8 to 12 in., 4-in. pots, $1.00; 15 to 18 in., balled and burlapped, $2.25.

JAPANESE FLOWERING CHERRIES

Autumn Is the Time to Make a *Lawn*

IN THE autumn there is no seeding, no drouth, no excessive heat. Seed sown in August and September germinates in time for a long stretch of favorable weather in which to become established before winter sets in. The winter ordeal is not so severe as the summer; and after it comes a long, cool spring, for further growth before midsummer and seeding time arrives. Fall, therefore, is the best time to sow.

The Value of Tested Seed

OUR lawn mixtures are cleaned and re-cleaned. Than our seeds are tested for germination to insure that they have in them the power to to grow. Our blends for various purposes are composed of several grasses, each of which has a purpose; some to make a quick turf the first summer, a little clover to help enrich the soil and fill in bare spots and always Kentucky Blue Grass of the finest quality to take hold in its own way, to spread and finally to dominate in the permanent turf.

See that the seed is well covered. Rake it into a new seed bed and roll so that the soil is firmed over the seed. Where seed is sown on an old lawn always cover it with a top-dressing of sand or soil and fertilizer. Seed thrown on the top of hard ground has no chance to grow and will merely wash off.

Quantity to Use—On new lawns use 1 lb. of seed for 300 square feet. To replenish lawns where turf is thin use half quantity.
